Dear Human Resource Manager,

I am writing to express my interest in the IT professional position at your organization. Apart from my Bachelor's degree I have also completed the CCNA study program and Databases. I am excited to apply my knowledge and skills to a challenging role in the IT industry.

In a CCNA study program, I gained hands-on experience in configuring and troubleshooting networks, designing network infrastructure and implementing security measures to protect networks from cyber attacks. Through the program, I have gained experience in using Cisco network devices such as routers and switches as well as other networking technologies i.e LAN, WAN and VPN. I have also gained a deep understanding of database management and administration.

In addition to my technical skills, I have excellent communication skills to flourish in a team oriented environment. I have experience working on group projects, communicating with team members to troubleshoot issues and presenting findings to stakeholders. I am also eager to continue learning from industry experts and expanding my knowledge of networking technologies as well as Database administration.

I believe that my skills and experience would be valuable for your team and that I could contribute to your organization's success.

Thank you for considering my application. I look forward to discussing my qualifications in more detail and how I can contribute to your organization.

Sincerely,

Martin Chunga

OBJECTIVE

Passionate IT professional with a Bachelor of Science Degree majoring Computer Science. Eager to work in Networking or Database management field to make the most of my skills in LANs and WANs, Databases, switches, routers, and standard networking protocols.

SKILLS

- Strong knowledge of configuring and verifying Ethernet LANs i.e VLANs and STP.
- Ability to configure and verify IPv4 and IPv6 routing i.e static routes, default routes and troubleshooting routes.
- Good understanding and implementation of OSPF like OSPF Areas, Link State Advertisements (LSA) and OSPF neighbor relationships.
- Strong knowledge of building and securing Wireless networks.
- Ability to configure and verify IPv4 access control lists.
- Strong knowledge of developing security programs to educate users and also monitoring and controlling user access to network resources.
- Good working knowledge of device management protocols like NTP, CDP and LLDP.
- Ability to configure and verify Network Address Translation i.e static NAT, Dynamic NAT and Overloading NAT with port address translation.
- Strong knowledge of implementing switch port security.
- Ability to configure and verify DHCP, DHCP Snooping and ARP Inspection.
- Good organizational skills, high integrity and strong attention to detail.
- Team player and very good at maintaining effective relationships with team and colleagues and also ability to work independently.
- Excellent communication skills to translate complex problems using non-technical terms to users.
- Good understanding of the use of syslog features including facilities and pools.
- Ability to configure and verify interswitch connectivity i.e Trunk ports (voice and data), 802.1Q and Native VLAN.
- Good understanding of designing and implementing database backup and recovery strategies.
- Good understanding of transaction management and concurrency control.
- Strong knowledge of database performance tuning and query optimization i.e selection of the optimum execution order and selection of sites to be accessed to minimize communication costs.
- Good understanding of distributed database management systems.
- Strong knowledge of database administration and security.
- Good understanding of advanced data modelling and normalization of database tables.

- Proficient in structured query programming(SQL) i.e subqueries and correlated queries.
- Strong knowledge of Business intelligence and data warehaouses.
- Good understanding of database connectivity and web technologies.

EDUCATION

- **University of Malawi**
Bachelor of Science

CERTIFICATIONS

- Introduction to Data Visualization.
- Certified Information Systems Security Professsional.
- Learn CCNA 200-301 Network Fundamentals Online.
